

Business Protection Services

Giving your business the power to fly.

A complete solution that addresses all of your business continuity planning needs.

Near Real-Time Backups

Our “Incremental Forever” methodology captures all changes to the initial image in increments of 15 minutes. The Incremental Forever technology not only backs up recent datasets but also allows end users to reconstruct the state of their data as it stood at the end of various 15-minute restoration points.

On-site Virtual Server

If any of your servers fail, our server virtualization technology embedded in the Clever Ducks Business Protection Appliance (CDBPA) allows customer servers and applications to be restored and rebooted in less than 30 minutes in most cases.

Intuitive and Flexible Restoration

Our solution allows for recovery of files, folders, partitions, mailboxes/messages, databases/tables using a quick and intuitive process. Our 15-minute incremental based backup allows restores to be done from any point in time, allowing for multiple versions of files, folders, messages/mailboxes, database/tables to be restored.

Affordable Cost

We offer a pricing packaged that is all inclusive of the complete backup and disaster recovery service with no hidden costs. All your costs are bundled and include the CDBPA, the Incremental Forever Methodology, file restorations, file integrity checks, secure data transmission and remote storage.

Secure Remote Storage

We employ the 256-bit Advanced Encryption Standard (AES) algorithm because it has never been broken and is currently considered the gold standard of encryption techniques and render transmitted data immune to theft.

24x7 Completely Managed Solution

Our Network Operations Center (NOC) monitors your CDBPA units and the attached servers 24x7. Failed processes generate immediate alerts to our engineers, who often remotely correct errors within minutes of receiving notification.

Highlights of the Clever Ducks Business Protection Service (CDBPS):

- Complete solution to reduce server down time.
- Allows near real-time backups-as frequent as every 15 minutes.
- Offers offsite storage at an affordable cost.
- Provides a low cost, speedy disaster recovery process.
- Data is encrypted on the CDBPA and at the offsite datacenter. Access requires passkey.
- Eliminates the cost and time of managing on-site tape backup.
- All costs and 24x7 management of the entire process are bundled at an affordable price.
